```
graph BT; A["/home/vasco/Vasco/facul /DA/2a2s-da-proj-2/interface.h"] --> B["/home/vasco/Vasco/facul /DA/2a2s-da-proj-2/interface.cpp"]; A --> C["/home/vasco/Vasco/facul /DA/2a2s-da-proj-2/main.cpp"];
```

The diagram illustrates a file dependency structure. At the top, a grey box represents a header file: /home/vasco/Vasco/facul /DA/2a2s-da-proj-2/interface.h. Below it, two white boxes represent source files: /home/vasco/Vasco/facul /DA/2a2s-da-proj-2/interface.cpp on the left and /home/vasco/Vasco/facul /DA/2a2s-da-proj-2/main.cpp on the right. Two blue arrows point from the source files up to the header file, indicating that both source files include or depend on the header file.
